Summary:

Seeking to participate in a Full-time employment opportunity which involve my passion, skills and experience in the field of Biomedical and grow with the developed organization.

Education:

University of Mumbai, Mumbai, India: Bachelor's in Biomedical Engineering Aug 2009-June 2013

Technical skills:

- Programming languages: C, C++, java
- Web technologies: HTML
- Application tools: G- suite, MATLAB, AutoCAD, MS Word, MS Excel, MS PowerPoint, Foxit

Work experience:

- **Associate Operations Manager at Elexes Medical Consulting, Bangalore, India Jan '19 - Present**
 - Involved in sourcing and nurturing ideas along with rolling them into the creation of improvement plans for the functional area
 - Working towards taking proactive steps to ensure that best practices are shared across all departments, shifts and among the network
 - Working closely with support staff (HR, Accountant, IT support, Project Manager and Hiring support) to build and secure support and resources for projects and initiatives in his/her area, as well as providing needed support and resources for other staff initiatives
 - Measures performance, provides feedback, and holds Team leads accountable for their performance and the performance of their team
 - Involved in operation that are Client facing
 - Involved in addressing operational and personnel issues affecting functional area.
- **Marketing Associate at Elexes Medical Consulting, Bangalore, India Sept '18 - Jan '18**
 - Involved in drafting and executing numerous marketing strategies.
 - Deep understanding of online media as a driving force behind brand marketing
 - Outstanding research and forecasting abilities
 - Strong analytical/quantitative skills
 - Excellent verbal and written skills
- **Medical Devices Intern at Applied Biomedical LLC, Placentia, CA, USA April '14-May '16**
 - Involved in Lab testing and analyzing the performance of the BGMS system.
 - Involved in testing the device with blood, serum and control solution using Glucometer, YSI (2700) and test stand.
 - Designed test protocols for testing various functionalities of the PRIMOS BGMS.
 - Actively involved in designing and conducting Pre-clinical in-house trials for the blood glucose monitoring system.
 - Involved in preparation of various reagents for testing.
 - Involved in Data Analysis and Compilation.
- **Project intern at Indian institute of technology, Mumbai, India Aug '12- March '13**
 - Designed a **Creatinine Biosensor** strip like the glucose biosensor with a portable colorimetric reader to measure the output wavelength proportional to creatinine concentration.
 - Tested the strips with comparable creatinine levels in the body to obtain desired color.

- Collaborated with a team of 3 people and two project advisors to design the sensor.
- Presented the project before the Head of Department (IIT) and Healthcare Entrepreneur in India.

- **Engineering intern at SJP Ultrasonic, Mumbai, India**

June '12- Aug '12

- Worked on Ultrasound Based Machines.
- Involved in proposing engineering aspects of the company's present and future products.

Projects:

- Worked on the **510K submission** for a **class II device**.

Jan '14 – May '14

- Drafted a complete 510(k) document as per 21 CFR 820 & ISO 13485.

- Worked on an **Audit project**

March '14

- Developed a Quality System Internal Audit study to analyze the possible areas of Quality testing and Risk Analysis with respect to the domain of Supplier Qualification for a Medical Device Company.
- Improved the level of research and understanding of 21 CFR 820 and ISO 13485.

- Worked on and completed successfully two **Neuroscience projects**

Sept '13 – Dec '13

- Implementing the **Hodgkin-Huxley's model** in Microsoft Excel and MATLAB to generate graphs.
- Generated a **Cerebellum like model** using MATLAB and understand sequence learning.
