Databases	Oracle 9i, Oracle 10g
GUI	Forms 6i/10g, Reports 6i/10g, XML Reports, Oracle Apps(11i/R12)
Tools & Utilities	Toad , SQL*PLUS, SQL*Loader, BI Publisher, Report Builder6i/10g, PL/SQL Developer
Domain Knowledge	Oracle SCM, Oracle Order Management, Oracle Inventory, Oracle Payables/ Receivables
Technology Skills	PL/SQL, Oracle Reports (D2K, BI), Interfaces, Conversions
Basic Knowledge	OAF, Oracle Workflow, Oracle Forms

Professional Experience:

- **Working as FreeLancer From Jun 2017 to till date.**
- **Worked as Sr.Consultant in ForeFront Inc from Jul 2012 to Jun 2015.**
- **Worked as Consultant in Fujitsu Consulting India. from Jun 2008 to Jun 2012.**

Education

- Bachelors of Engineering in Information Technology, Anna University, 2005.

FreeLancer

Jun 17 to Till Date

Working as Freelancer for the client based on task.

- Conducted class room and Virtual Training on SQL, PL/SQL and AOL Basics.
- Responsible for creating tables based on Normalization rules.
- Developed RDF reports for the client.
- Reviews code, and ensures development adheres to development and QA standards.
- Extensively developed and modified PL/SQL packages, procedures, functions, triggers.
- Performed Report testing by validating layout, data in the report.
- Worked on SQL scripts to load data in the tables.
- Coordinated directly with client for requirement gathering and testing.
- Performed unit testing.

Mastec, USA

Jul 12 to Jun 15

MasTec companies have been involved in some of the largest and most complex infrastructure construction projects across the country. Their experience has given us a deep and comprehensive understanding of the markets we serve, as well as the ability to effectively manage people, projects and equipment. It allows us to proactively identify challenges, avoid pitfalls, and overcome obstacles, and to accurately set and meet expectations for schedule and budget.

This is a Support & Upgrade project. The scope of the project involved migrating the objects from 11i to R12 and supporting both the systems.

Role:

- Responsible for the timely delivery of all technical components related to support and maintenance.
- Worked with functional business analysts and other technical team members to establish solutions and detailed technical designs for given business requirements.
- Assists in the management of offshore resources, ensures they have the information they need to work on items assigned specifically to them, and gets them past blockers.
- Reviews code, and ensures development adheres to development and QA standards.
- Designed various interactive UI and modified various Forms.
- Extensively developed and modified PL/SQL packages, procedures, functions, triggers.
- Changing the code to support R12 version.
- Designed & developed various reports.
- Participated in regular project status meetings related to testing.
- Performed Report testing by validating layout, data in the report.
- Performed Change Request whenever the customer needs to change their existing Business Rules or they may integrate a new rule.
- Knowledge sharing with team members.
- Creating and maintaining project documents.
- Worked on SQL scripts to load data in the tables.
- Coordinated directly with client for requirement gathering and testing.
- Performed unit testing.

- Documented test plans, functional and validation test plans, data access test plans, Authorization test plans, performance test plans.
- Performed unit, integration, support integration testing and validated live business process results.
- Developed final end user training and documentation content.

McDonald's, USA

Jan 12 to Jun 12

The McDonald's restaurant concept was introduced in San Bernardino, California by Dick and Mac McDonald of Manchester, New Hampshire. It was modified and expanded by their business partner, Ray Kroc, of Oak Park, Illinois, who later bought out the business interests of the McDonald brothers in the concept and went on to found McDonald's Corporation.

Established in 1975, IFFCO is a United Arab Emirates based business house, which manufactures and markets a well-integrated range of consumer products. IFFCO operates under the following business segments: Impulse Foods, Agri Business, Oils & Fats, Packaging, Sales and Distribution. IFFCO also manufactures related derivatives and intermediates associated with these business segments.

This is an Implementation project. The Scope of the project included development of various objects in Order Management and HRMS module.

- Involved in unit testing and performance testing for reports.
- Involved in writing Control Files for SQL Loading
- Developed Installation Scripts (Responsibilities, Menu, Request Groups, Concurrent Programs, Executables etc.,)
- Unit testing and Integration testing for those objects.
- Registering Custom Components (Reports, pl/sql packages)
- Creation of Concurrent Executables, Value Sets Concurrent.
- Developed various Xml reports.
- Developed migration scripts.
- Creating a new Procedure.
- Customization of existing PL/SQL code.
- Decide the test strategy & Create Unit test cases as per the same.
- Documented the step by step process of navigation of the product for clients understanding.
- Involved in giving presentations to the client about the product.

Abu Dhabi National Industrial Projects (ADNIP), we specialize in identifying, developing and operating high-value commercial ventures. We are rooted in a history of growth guided by knowledge and expertise from our majority stakeholders. It is how we became the first Group to set up some of the most successful companies in the region - in areas as diverse as medical devices, business consulting, carpets and tissue paper manufacturing

This is an Implementation project. The Scope of the project included development of various objects in Order Management Module.

Role:

- Worked on Order Management module.
- Created Mail Notification Alerts for every New Order Booked, any Order Changed and any Order Cancelled.
- Developed various xml reports.
- Developed Bank conversion.
- Responsible for developing Migration Scripts for Concurrent Programs and Custom Objects.
- Created MD70 documents for the objects developed.
- Involved in unit, regression and stress testing process before implementing in Production.
- Involved in development of PO conversion.
- Developed price list report and Performa invoice report.
- Developed open AR Invoice Conversion.

ADPC inaugurated the magnificent Khalifa Port at 1200 on 12/12/12 - with the most advanced container terminal in the whole region and for a radius of 5,000 kilometers. The nearest port to match our facilities is Singapore.

This is an Implementation project. The Scope of the project included development of various objects in HRMS Module.

- Worked on HRMS Payroll module.
- Developed Element Link conversions.
- Developed various Xml reports.
- Registration of concurrent programs, parameters for custom reports specific to Applications.
- Prepared Migration Scripts for Concurrent Programs using FND load command.
- Created MD70 documents for the objects developed.
- Developed Open AP Invoice conversion.
- Developed RFP Invitation letter, Employee Education Details Report, Employee Additional Information Report.
- Developed Customer Conversion.
- Involved in designing table level constraints and indexes required for system.
- Created PL/SQL Functions, Procedures, Packages.
- Created Database Triggers to restrict transactions.
- Involved in debugging process.
- Understanding the client Requirements (CR - Change Request, PR - Project Request).
- Analyze the Change & thus create an Approach Document/Design Document.
Coding as per the Design Document.
